**DATE:** September 3, 2015  
**MEMO TO:** S. Michael Rummel, Chair  
Finance and Administrative Committee  
**FROM:** James L. Anderson, Director  
Natural Resources  
**SUBJECT:** 2015/2016 Deer Management Program

**Agenda Item#** 9.4

**RECOMMENDATION:** Recommend approval of a Resolution approving a Cooperative Service Agreement for deer management with the U.S. Department of Agriculture Animal and Plant Health Inspection Service Wildlife Services (“USDA”) for the 2015/2016 Deer Management Program in a Contract Price not to exceed \$75,000.00.

**BACKGROUND:** This resolution is required for the District to enter into an agreement to conduct deer removals at District preserves using U.S. Department of Agriculture Animal and Plant Health Inspection Service Wildlife Services (USDA) personnel.

The Board first approved using USDA personnel to conduct deer removals on District property in 2002. The District has been very satisfied with the USDA, which has consistently provided professional service using trained wildlife biologists, resulting in a highly efficient, effective and safe program.

The Cooperative Service Agreement for the 2015/2016 deer management program will begin on approximately November 30, 2015 and end when the removal goals are reached, or no later than March 31, 2016. Deer removals will be conducted Monday through Thursday nights on a week-by-week basis, and may occur at the following preserves: Grant Woods, Independence Grove, Lakewood/Ray Lake, Lyons Woods, Middlefork Savanna, Old School, Rollins Savanna/Fourth Lake, Ryerson Conservation Area/Cahokia Flatwoods, and Wright Woods/Grainger Woods/MacArthur Woods.

**REASON FOR RECOMMENDATION:** Committee recommendation and Board approval are required in accordance with District policy.

**REVIEW BY OTHERS:** Chief Operations Officer, Director of Finance, Legal Counsel

**FINANCIAL DATA:** This program was approved as part of the adopted FY2015/2016 Land Development Levy Fund Budget for Consultants, in an amount not to exceed \$75,000.00. The actual cost, up to \$75,000.00, will be charged to account 27644000-701500.

## ATTACHMENT A WORK PLAN

### Introduction

The U.S. Department of Agriculture (USDA) is authorized to protect American agriculture and other resources from damage associated with wildlife. The primary authority for APHIS WS is the Act of March 2, 1931 (46 Stat. 1468; 7 U.S.C.426-426b) as amended, and the Act of December 22, 1987 (101Stat. 1329-331, 7 U.S.C. 426c). Wildlife Services activities are conducted in cooperation with other Federal, State and local agencies; private organizations and individuals.

The APHIS WS program uses an Integrated Wildlife Damage Management (IWDM) approach (sometimes referred to as IPM or "Integrated Pest Management") in which a series of methods may be used or recommended to reduce wildlife damage. IWDM is described in Chapter 1, 1-7 of the Animal Damage Control Program Final Environmental Impact Statement (USDA, 1994). These methods include the alteration of cultural practices as well as habitat and behavioral modification to prevent damage. However, controlling wildlife damage may require that the offending animal(s) are killed or that the populations of the offending species be reduced.

### Purpose

To assist LCFPD with meeting the objectives of their White-tailed Deer Management Plan.

### Planned APHIS WS Activities

Through the implementation of management measures described below, objectives of the LCFPD's White-tailed Deer Management Plan will be met. Actions will include Direct Control assistance as well as Technical Assistance recommendation to further enhance the effectiveness of the integrated deer management program. These objectives are to help reduce damage and public safety threats caused by white-tailed deer on property managed by the LCFPD.

APHIS WS employees will be used to assist with the White-tailed Deer Management Plan of the LCFPD. WS responsibilities will include:

- Coordinate with the Project Manager and IDNR staff to inspect, propose and certify baiting and shooting zones to be used.
- Provide equipment necessary for removal operation with the exception of some processing equipment which shall be provided by the LCFPD (equipment availability shall be coordinated prior to removal operation).
- Obtain IDNR qualification for all sharpshooters.
- Removal of permitted white-tailed deer from Lake County Forest Preserves via sharpshooting in compliance with District policy.
- Collect and transport carcasses to Meehan Garage.

- Eviscerate and clean deer carcasses.
- Ice carcasses, if necessary, in advance of carcass transportation to a venison processing facility the following morning.

LCFPD staff will be responsible for the following tasks:

- Obtain Deer Population Control Permit from IDNR, necessary authorizations from Lake County authorities and Illinois Nature Preserves Commission.
- Presence of the Project Coordinator during all phases of the project. The Project Coordinator shall be present and reachable via cellular phone during removal activities.
- Stock bait sites nightly for at least 1 week continuously prior to removal operations. Bait sites shall be agreed upon by APHIS WS and IDNR.
- District Rangers shall verify that forest preserves are closed and empty of visitors prior to removal operations.
- A District Ranger will be available via cellular phone during removal operations.
- Transport processed carcasses to the designated venison processor each morning.
- Keep records as required by District policy and IDNR, and report results to IDNR upon completion of the program.

Chronic Wasting Disease: APHIS WS and the LCFPD will cooperate, to the extent possible, with the IDNR in monitoring efforts for chronic wasting disease in the deer collected during this program. APHIS WS staff will collect brain stem and tissue samples for LCFPD staff to submit to the IDNR for testing. Reporting requirements of the IDNR on the samples collected will be maintained by the LCFPD Wildlife Biologist.

Action: APHIS WS employees will work directly with the LCFPD Wildlife Biologist to establish nightly control activities relating to the White-tailed deer Management Plan. Management of the white-tailed deer includes the utilization of the IDNR's sharpshooter program.

Use of Equipment: APHIS WS will use USDA-owned rifles equipped with noise-suppression devices, spotlights and an infrared device for locating deer and to monitor for the potential presence of the public in the forest preserve during operations, vehicles (including all-terrain vehicles), and radio equipment during the control operations.

#### Effective Dates

The cooperative agreement shall become effective on October 1, 2015 and shall expire on March 31, 2016.
