SUBJECT: Shrubland Bird Habitat Restoration at Greenbelt Forest Preserve

Agenda Item# 9.9

RECOMMENDATION: Recommend approval of a Resolution awarding a Contract for the Shrubland Bird Habitat Restoration at Greenbelt Forest Preserve to Trees "R" Us, Inc., Wauconda, Illinois in the Contract Price of \$39,875.00.

BACKGROUND: The goal of this habitat restoration project is to expand the acreage of native plant and animal communities by removing dense thickets of non-native shrubs, primarily buckthorn, and thin invasive native trees and shrubs throughout the 25-acre project area. Cut woody material will be stump treated and resprouts herbicide treated the following growing season. Greenbelt Forest Preserve provides habitat for 11 bird and reptile species identified as Species in Greatest Need of Conservation by the Illinois Dept. of natural Resources and US Fish and Wildlife Service. Greenbelt provides rare habitat for rare shrubland bird species such as warblers, flycatchers, and brown thrashers and the reptile green snake.

Funding for this project is provided in part by a \$100,000 grant from the Illinois Coastal Grant Program. The District is partnering with Alliance for the Great Lakes and Audubon Chicago Region to engage the local community to support and foster an environmental connection and awareness by recruiting and hosting volunteer habitat restoration workdays and field trips throughout the year.

The project was advertised on August 10, 2015 and seven bids were received. A summary of the bids received is listed below:
