**MEMO TO:** Bonnie Thomson Carter, Chair  
Planning and Restoration Committee

S. Michael Rummel, Chair  
Finance and Administrative Committee

**FROM:** James L Anderson  
Director of Natural Resources

**Agenda Item#** 9.5

**RECOMMENDATION:** Recommend approval of a Resolution awarding a Contract for the Habitat Restoration Phase IV Clearing at Edward L. Ryerson Conservation Area to V3 Construction Group, Ltd., Woodridge, Illinois, in the Contract Price of \$120,120.00.

**STRATEGIC DIRECTION SUPPORTED:** Conservation

**FINANCIAL DATA:** This item was approved as part of the adopted FY2016/2017 Capital Improvement Plan, Southern Des Plaines Preserves Woodland Habitat Restoration Project, in the amount of \$280,000.00. This portion of the project was estimated in the amount of \$117,300.00. The actual cost of \$120,120.00 will be charged to the Capital Improvement fund; Southern Des Plaines Preserves Woodland Habitat Restoration Project, account 20104100-803200-65004.

**BACKGROUND:** Ryerson Conservation Area, in southern Lake County, contains some of our highest quality natural areas and oak ecosystems. Oaks are considered a keystone species in the Chicago region and play a critical role in maintaining the structure of the woodland community, providing food and shelter for many other species. Unfortunately, oak seedlings and saplings in our woodlands are not receiving enough sunlight to thrive. Without action now, oak woodlands in Lake County and the Chicago region will not survive in the long term. This woodland habitat restoration project will encourage the growth of oak and other native saplings by selectively removing trees and shrubs to open up the canopy to increase light reaching the ground level. These thinning efforts will allow future generations of oaks to mature, allow for reintroduction of native shrubs and other native ground layer species, rebuilding a sustainable woodland habitat for the future.

The goal of this project is to promote oak regeneration over 42 acres of the dry mesic wooded communities within Ryerson Conservation Area. Work consists of mechanical and hand-cutting with sheers and chainsaws, stacking of brush with skid steer loaders, brush pile burning, hauling of logs, and herbicide application to cut stumps and growing season re-sprouts.

The project was advertised on June 7, 2016 and 8 bids were received. A summary of the bids received is listed below:
