**BACKGROUND:** Invasive plant management includes the removal of invasive plants from District lands to improve and conserve habitat quality. It is the most time-consuming task faced by District natural restoration crews, and is a significant challenge to habitat conservation. Management of invasive plants is necessary to improve and conserve habitat quality and species diversity on District properties throughout Lake County. To more efficiently accomplish this work, each year, the District hires contractors on an hourly basis to complete several projects to manage herbaceous invasive plants.

The District advertised for bids for season-long control of invasive plants at Cuba Marsh, Middlefork Savanna, Grassy Lake, and Fort Sheridan and for control of teasel (an invasive flowering plant) at several other preserves (the “Projects”).

The projects were advertised on January 14, 2022 and bids were received from six bidders. Work is anticipated to begin in April and to be completed by December 2022. A summary of the bids received is listed below, with each low bid highlighted:

VENDOR	Cuba Marsh	Middlefork Savanna	Grassy Lake	Fort Sheridan	Teasel Control Only

Staff recommends that the Board find that the bidders submitting the highlighted bids above are the lowest responsible bidders for the associated Projects and awards contracts to such bidders accordingly.
