

Unauthorized trails leading down the bluff of Lake Michigan where sensitive species are located

Unauthorized trails leading down the bluff of Lake Michigan where sensitive species are located

Unauthorized trails through marram grass, a state-listed species that stabilizes the dune

Aerial views of multiple unauthorized trails leading down the bluff of Lake Michigan where sensitive species are located. These steep slopes are extremely vulnerable to erosion leading to slope failure.

Trash collected during the annual lakeshore clean-up event

Dogs off-leash put the endangered, threatened and rare species at risk.

Fragmentation of forested Lake Michigan flyway
